The 4th April 1899.

PERS IN CONNECTION WITH THE BUBONIC PLAGUE.

REPORT OF PLAGUE IN THE MYSORE STATE, EXCLUDING THE CIVIL AND MILITARY STATION, FOR THE WEEK ENDING 24TH MARCH 1899.

Bangalore City

The following are the figures in the City up to date :—

	Plague cases.	Plague deaths.	Deaths from all causes.	Normal recorded mortality in the same period.
From 12th August 1898 to 24th February 1899 ..	3,330	2,651	7,076	708
Week ending 3rd March 1899	1	1	31
Week ending 10th March 1899	1	37
Week ending 17th March 1899	2	32
Week ending 24th March 1899	Nil Nil	35 32

There were no cases of plague during the week in the City, and the total mortality was only very slightly in excess of the normal recorded mortality for the past 5 years. Owing to the redistribution of the Wards, the compilation of the return of arrivals in the City has been delayed, and the figures cannot therefore be given.

II. The figures for the Health and Segregation Camps were as follows :—

	Remaining.	Admitted.	Discharged.	Developed plague.	Remaining.
Health Camps ..	291	93	5	..	379
Segregation Camps ..	9	..	9

III. During the week there were 519 first inoculations and 2 second inoculations bringing the totals to 33,349 and 1,373, respectively. No inoculated person was attacked with plague during the week.

IV. The Hospital figures were as follows :—

	Remaining.	Admitted.	Discharged.	Died.	Remaining.
For the week 1 1
Since commencement	2,096	742	1,354	..
Inoculates	105	65	40	..

V. During the week, 212 houses were disinfected as against 225 in the previous week, of which 41 were deserted ones, 24 were plague-infected and 47 were locked-up ones opened under Government Notification No. 5235—Pg. 21-96, dated 15th October 1898.

VI. During the week, permission was given to re-occupy 121 houses; no charge was levied for disinfecting 27 houses; 2 houses were disinfected by the owners themselves, and the charges realised from the remaining 92 amounted to Rs. 168.

VII. During the week under report, the Wards in the City were re-arranged, the two Sub-Wards with their establishments costing Rs. 72 a month being abolished, and the remaining four Wards being placed under the charge of 4 Ward Officers. A graded Medical Officer assisted by an Hospital Assistant and a Lady Apothecary has been placed in medical charge of every two Wards.

During the week, the Notification prescribing disinfection of departures from Bangalore City by rail, was withdrawn by the Resident.

VIII. The cost of road work and earth work and of pipes laid for water supply in the Basavangudi and Mallewara Extensions, amounted to Rs. 4,089 as against Rs. 5,981 in the previous week, bringing the total amount spent to Rs. 48,500. During the week 10 infected houses were destroyed, and 14 houses were removed for opening out congested parts of the City.

To prevent concealment of cases, the infringement of the Plague Regulations in the matter of reporting deaths, cases of sickness, departures from the City and change of residence, is carefully watched. During the week 3 persons were prosecuted for violating the Epidemic Diseases Regulation and 2 of them fined As. 8 and Re. 1, respectively, as against 5 prosecuted during the previous week.

Mysore State outside Bangalore.

IX. The accompanying weekly return shows the state of the Epidemic in the Province :—

During the week the number of cases increased in the Districts of Bangalore, Kolar, excluding Kolar Gold Fields, and Tumkur, but decreased in Mysore and the Kolar Gold Fields.

In the Bangalore District, excluding Bangalore City, the number of cases was 51 as against 43 in the previous week. In the taluks of Bangalore, Dodballapur, Nelamangala, Devanhalli and Anekal, the number of cases increased from 3, 3, 10, 7 and 5 to 4, 5, 14, 11 and 6, respectively, and in those of Hoskote and Kankanhalli, it decreased from 6 and 3 to 4 and 1 respectively. The sub-taluk of Closepeta had during the week the same number of cases as in the previous week, viz. 6; while the taluks of Channapatna and Magadi were altogether free. The latter taluk having been free from plague for the past four weeks will be removed from the list of infected areas.

The number of infected villages decreased from 31 to 28, of which 16 reported cases as against 20 in the week previous. The number of newly infected villages was 5 as against 6 and of re-infected villages 3 as against 2.

In the Kolar District, excluding the Gold Fields, the number of indigenous cases increased from 11 to 15 and the number of infected villages from 7 to 9. Two villages were newly infected and 2 villages were re-infected during the week.

In the Gold Fields, the number of indigenous cases decreased from 53 to 43, while the number of infected villages increased from 16 to 20 of which 2 were newly infected and 2 were re-infected.

The following statement shows the cases among the several mines for the past 4 weeks :—

26 Dod Kambli	1
27 Ernagonpalli
Total .. .	42	26	1	1	49	30	2	2	53	54	1	1	1

This week also, for the fourth time, the Tumkur Town reported no cases, and the question of declaring it free from infection is under consideration. But in the district, the number of cases increased from 8 to 21 and the number of infected villages from 5 to 11, of which 3 were now infected and 3 re-infected.

The infection is confined in the district to Koratagere sub-taluk and to the taluks of Kolar and Tumkur. The cases in each were 6, 3 and 12 as against 0, 4 and 4, respectively, in the previous week.

In the Mysore district, excluding the Mysore City, the number of cases decreased from 29 and that of infected villages from 9 to 6.

In the Mysore taluk there were 6 cases as against 4, in the Seringapatam taluk 8 against 9 and there were no cases in the taluks of Mandya, Hunsur and Heggaddevankote, the first of which has now been free for 4 weeks and the others for the past 2 weeks.

In the Mysore City the figures were as follows :—

	Plague cases.	Plague deaths	Total mortality.	Normal recorded mortality during the same period.
For the week ending 3rd March 1899	194	186	233	35
Do 10th do	140	124	160	36
Do 17th do	110	91	139	36
Do 24th do	73	70	120	36

The decrease was steady all round, the number of attacks falling from 110 to 73, of deaths from 91 to 70 and total mortality from 139 to 120.

During the week 335 persons or a daily average of 47 were disinfected with their effects at the Mysore City Railway Station.

Extract of the Bangalore District Plague Officer's Diary for the week ending 24th March 1899.

* * * * *

The readiness with which the people are coming forward to do the (disinfection) work themselves under the new rules, leads me to believe that we shall very soon get through with the work. This is more desirable as the people who are camped out now are having a very unpleasant time; it is very hot, and during the greater part of the day, a strong and exceedingly disagreeable east wind prevails raising any amount of dust and blowing the roofs off the huts and knocking them about generally as they are but flimsy structures. The dryness and the wind are also responsible for several cases so that although the weather is fine and there is no rain, still camping out under these conditions is not at all enjoyable.

* * * * *

Extract from the Diary of the District Plague Officer, Bangalore, for the week ending 24th March 1899.

* * * * *

With regard to the query of the Plague Commissioner in my last Diary regarding some plague cases in Kadgodi village, I have obtained the following information :—

One month after the evacuation of the village, Chikdasappa, Kudure Venkataramanappa, Sulba, Nisami and Muniyappa, who were camped out in the fields, went one night to their houses to fetch jewels valued at Rs. 900 and some bags of ragi which they had secreted in a grain pit.

There had been neither dead bats nor dead rats in the house prior to the evacuation. On opening it a dead rat was found, of which no notice was taken. On their return these men were attacked by plague and died, so that it would seem as though they caught the infection from the grain pit.

Extract from the Diary of the Special Plague Officer, Kolar Gold Fields, dated 26th March 1899.

* * * * *

The villagers' chief objection to camping out is the fear of loss of property. I honestly believe we have not yet recruited a police force who can be depended on in emergencies like this. It is that makes me hesitate to order wholesale evacuation of villages. I am trying to form a vigilance committee for this village (Gollapalli) to guard their own property.

Mr. Hancock has kindly promised to receive all sealed packets for safe custody in the strong rooms of the mines. If the problem of safe custody of property could be solved, plague measures could be worked out with very great facility. Meanwhile I am trusting to inoculation to ward off the severity of the epidemic.

We are only in the middle of the epidemic. It will take another month, if not more, before we reach to the end of it.

* * * * *

Plague Commissioner's Remarks.

"To the Deputy Commissioner: Invite attention to the provisions of the new rules for evacuation, disinfection and ask for favor of a proper establishment being provided for guarding property."

* "Will you please verify the information I got at Kadgodi (Whitefield Railway Station) about families who had camped out having caught the infection by going to their houses and bringing ragi from them?"

Cases and Deaths (in-patient) from 12th August 1898 to 24th March 1899, week ending Friday, the 24th March.
